

SUMMARY

Professional with over 4 years of experience building reliable, user-focused applications. Skilled especially in Python and JavaScript. Known for contributing to product enhancements and optimizing software processes. Experienced in effective teamwork professional, with a problem-solving mindset and a passion for continuous learning

EXPERIENCE

Full Stack developer - IBM

Developed and maintained web applications using mainly Python and Vue.js. Worked with both relational and NoSQL databases. Led backend improvements and supported the migration of key systems from Java to Python

Intern Developer - IBM

Supported maintenance tasks and small feature updates in internal systems. Gained hands-on experience in agile development and version control. Contributed to team discussions and became a more communicative and collaborative team member, while continuously learning best practices

EDUCATION

Data Science & Analytics

USP Esalq

📅 2024 – Present

📍 Distance learning

🎓 MBA

Systems Analysis and Development

Fatec

📅 2021 – 2023

📍 Campinas, SP

🎓 Associate

Computer Science

Etec

📅 2018 – 2020

📍 Hortolândia, SP

🎓 Technical

LANGUAGES

Portuguese
Native language

English
Fluent, CEFR C1-C2, EF certificate

Spanish
Intermediate, CEFR B1-B2, EF certificate

SELECTED PROJECTS

Portfolio App

A project that gets together my skills, projects, experience, and more, using technologies such as Next.js, Tailwind, and Typescript.

Soroban App

An application of an online Soroban, a calculating tool that uses beads on rods to perform arithmetic operations, made using React and pure CSS.

You can check all more about the Opensource projects in github.com/rhaiz

KEY ACHIEVEMENTS

Version Control Standardization

Led the initiative to define and implement a standard for naming branches, commits, and pull requests, integrating GitHub with Jira workflows to improve traceability by 20% and reduce code review time

Database Performance Refactoring

Applied problem solving skills and refactored legacy database queries by implementing partitioning, reducing average query time by 30% and preventing timeouts in production

SKILLS

PythonJavaScriptNoSQLSQL

HTMLCSSCI/CDVersion Control

DesignAgileGitDevOps

TOOLS

VS Code · PyCharm · Cloudant · DBeaver · GitHub · Google Colab · Insomnia

COURSES

Clean Code

Focused on writing readable and maintainable code using SOLID principles in Python and JavaScript

Python: building efficient systems with SOLID and Design Patterns

Focused on using design patterns and SOLID principles with Python

CERTIFICATIONS

Software Engineer

A HackerRank Software Engineer shows strong foundational and practical skills in problem solving, SQL, and REST API through coding challenges

Developer profession - Level 2

An IBM Experienced Developer understands client needs and applies knowledge to develop high quality solutions that deliver business value to the client
